RADIOPHONIST COURSE

This course enables you to communicate with the control tower of an airport or with other aircrafts that are flying in the area. This certificate is necessary to carry out flights in controlled airspace.

REQUIREMENTS

- Minimum age 18 years old.
- Valid ID. /passport.
- Be in possession of the Advanced Drone Pilot course or new standard equivalency.

AIM

The main objective of the radio course is to obtain the necessary knowledge to be able to carry out communications with airport services, an airport / aerodrome control tower or even with other aircraft that use the same space.

An online exam and practical training will be carried out at WORLD AVIATION FLIGHT ACADEMY.

DURATION

The duration of the course is 10 hours, of which 6 hours will be taught online and the remaining 4, in person.

DEVELOPMENT

WORLD AVIATION FLIGHT ACADEMY provides in the Training Manual for this course, all the means and knowledge necessary for the development of the course.

Regarding the **practical training**, different scenarios of tower-pilot, pilot-tower and pilot-pilot communications will be heard, followed by simulation exercises.

TRAINING CENTERS

We offer monthly calls for face-to-face practice with our instructors, at one of our locations:

MADRID - CUATRO VIENTOS

Cuatro Vientos Airport is in the Southwest area of the region. We offer an ideal training ground which shares many of the characteristics of the scenarios to operate with the aircraft. Our modern facilities and classrooms provide a professional and friendly learning environment.

MÁLAGA - COSTA DEL SOL

International Airport with additional classrooms and training areas. In addition, Costa del Sol offers a full set of flight conditions including mountain areas, providing the student-pilot with a well-rounded flight experience.

If you want to do practices in another region, contact us.

THEORETICAL TRAINING

The course consists of approximately 6 hours, distributed in 8 blocks with their respective presentations, exercises and tests.

Knowledge

- Classification of airspace and air traffic services.
- Principles of radio and communications.
- Radiotelephony and communications.
- Radio procedures.
- Emergency procedures.
- Theoretical exam.

PRACTICAL TRAINING

The 4 hours of practical training will take place at our headquarters.

Training program:

- Measurements and knowledge of different radio stations.
- Communication procedures with different receivers.

THE COURSE INCLUDES

- Theoretical classes.
- Theoretical exercises.
- Official exam question bank
- Aptitude practices and assessments.

PRICE

RADIOFONISTA 220€ | PROMOTION 120€
