AESA EXAM TRAINING (STS-ES 01 & 02)

This course will prepare you to take the official exam of the State Air Safety Agency, of a Drone pilot in a Specific Category (STS-ES 01 and STS-ES 02). We will provide you with the necessary knowledge to be able to take the official test and obtain the certification that will allow you to operate throughout the Spanish and European territory.

REQUIREMENTS

- Be at least 16 years of age.
- Valid ID/ passport
- Be registered in the electronic headquarters of AESA (State Agency for Aviation Safety)
- Have passed the exams at least open category A1 / A3

OBJECTIVE

The objective of this course is to train and prepare the student, working on the necessary contents and programs that are required in the Specific Category (STS-ES 01 and 02) to take the official test of AESA (State Agency for Air Safety), and Obtain the certificate that will allow you to operate within the specific category scenarios throughout the Spanish and European territory.

The “specific” category includes those operations that, due to their risk, do not meet the requirements of the open category, such as:

- BVLOS (beyond the pilot’s visual line of sight).
- In urban environments with Class 2 drones or lighter than 4 kg without CE marking.
- Over agglomerations of buildings, people, etc.

DURATION

The approximate duration of the course is about 30 hours, although it will depend on the availability of the students.

DEVELOPMENT

WORLD AVIATION FLIGHT ACADEMY provides in the Training Manual for this course, all the means and necessary knowledge for the student to be prepared to face the official exam of 40 questions based on 8 subjects (if you hold an A1 / A3 degree) or 30 questions based on 5 subjects (if you hold A2), which will be done online at the State Air Safety Agency.

Regarding practical training, we will train and practice all the criteria established and required by the Agency to operate in STS-ES 01 and 02.

TRAINING CENTERS

We announce monthly calls for presential practical exercises with our instructors, at any of our locations:

MADRID - CUATRO VIENTOS

Cuatro Vientos Airport is in the Southwest area of the region. We offer an ideal training ground with many of the characteristics of the scenarios to operate an aircraft. Our modern facilities and classrooms provide a professional and friendly learning environment.

MÁLAGA – COSTA DEL SOL

Málaga International Airport with additional classrooms and training areas. In addition to this, Costa del Sol offers a full set of flight conditions including mountain areas, providing the student-pilot with a well-rounded flight experience.

For Information about practical training In the different locations, please contact us.

THEORETICAL TRAINING

The course consists of approximately 30 hours, distributed in 8 blocks with their respective presentations, exercises and tests.

Knowledge

- Aviation regulation.
- Limitations of human performance.
- Operational procedures.
- Technical and operational risk mitigation in air.
- General knowledge on UAS.
- Meteorology.
- UAS flight performance.
- On land technical and operational risk mitigation

PRACTICAL TRAINING

The practical training will be carried out for the training and assessment of practical

skills according to the national standard scenarios.

Training program:

- Pre-flight measures
- Procedures during the flight.
- Post-flight actions

THE COURSE INCLUDES

- Theoretical classes.
- Theoretical exercises.
- AESA question bank
- Practical exercises and assessment of pilot aptitudes.
